## For Homes & Offices

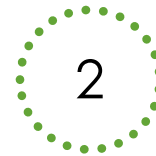

## What We Offer

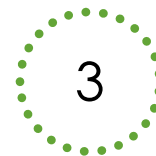

### **MINI URBAN FARMS**

Installation of Mini Urban Farms based on Organic Agriculture principles at Open Plots, Terraces & Large Balconies. Microgreen Cultivation Units & Hydroponic Hyperlocal Farms at Community Spaces.

### **ECO RENEWAL**

Ecological turnarounds and re-vitalization of residential, commercial & residential sites. Our multi-faceted methods re-claim environments and re-introduce natural cycles of water, waste-management & organic vegetation in urban spaces.

### **PROJECT MAINTENANCE**

Organic Agri-Tech project solutions and Annual Maintenance Contracts (AMC) for all types of green projects. We offer reliable, long-term partnerships that are customer-centric and result-oriented.

## Rooted in Agriculture....

With over seven years in R&D, our unique expertise is in the development of productive and sustainable ecosystems. Using inputs from urban planning & environmental engineering, we design and execute urban farms, and revitalize urban spaces productively. Our forte is farming. Our earth products - marketed under the brand name '**Mandy's Farm**' - are the most highly reputed across India. So, if what you need is to convert unused, underutilized or dead urban spaces into farms that grow food for the communities they serve, call us - ***we know how to grow!***

# Who We Are

Founded in 2013, GCS is India's premier organic agriculture and ecological solutions company. We believe in harnessing science and technology to achieve sustainable solutions. These include permaculture, integrated farming, waste management, recycling, renewable energy, crop protection and bee-keeping. As creators of India's first comprehensive range of organic & natural earth products, sold across multiple online platforms under the brand name '**Mandy's Farm**' our record of service covers thousands of customers across the country.

Our executive team includes policy experts, environmental engineers, water resource and waste management specialists, renewable energy experts, project managers and business analysts with doctoral and postgraduate qualifications from the U.S. & Australia, and field experience in developed and developing nations.
